Rev. 5/4-11-2016

WALK BEHIND POWER TROWELS

Reliable and safe machines especially useful for small to medium-sized projects.

Description

These new designed trowels are reliable and very economic machines complying with the latest European CE regulations. With these machines you can produce a nice finish of concrete floors with less effort and against a very low price per square metre.

Characteristics

Main characteristics of the LTM walk behind trowels:

- The new line of LIEVERS walk behind trowels are safe, easy going, lightweight and powerful.
- Equipped with a high quality safety handle.
- Strong gearboxes and blade arms, nice painted finish and long handles with a perfect grip make these trowels a pleasure to work with.
- LTM 600 machines are standard equipped with combination blades and LTM 900 machines with finish blades. Both types of machines have a lifting bale for easy handling on the construction site.
- LTM 600 is equipped with rotating guard ring for working up to the wall.
- Of course we have blades and pans available which are made from the best possible quality of steel, for maximum wear resistance and long life.

Safety handle

Technical information

TYPE MACHINE	WORKING DIAMETER	DRIVE UNIT	MAX ROTOR SPEED	WEIGHT
mm	mm		per min.	kg
LTM 600 *	600	5.0 PK Honda gasoline	135	59
LTM 900 **	900	5.5 PK Honda gasoline	130	65

* With rotating guard ring, lifting bale and combination blades.

** With lifting bale and blades in finish style.
