

TARBOX

by **ESSENER**
EQUIPMENT CO.

The TarBox is ideal for spreading sand, stone chippings, blinding and all bitumastic type materials; designed primarily to suit Avant 500 to 700 series loaders and can be adapted to work with most other brands of articulated loaders with boom float ability and works particularly well if also fitted with a telescopic boom.

A removable reducing plate, if the operator only wanted to run a narrow strip of material from the TarBox he inserts the plate and adjusts it to suit

We offer the option to offset the TarBox. For instance when an operator is laying material close to a wall or kerb. The offset can be used to move the TarBox 180 mm to the left or right off the centre line

Divider plate allows narrowing of dispensed material for narrower strips to be laid

***** It is *important* that the machine is fitted with Boom Float & is not ideally suited to skid steer type loaders**

Model	Size	ULW Kgs	Approx. Cub. Metre Capacity Level +80% Heaped
TB1000-F	1000mm Fixed	270	0.3cu.m
TB1200-F	1200mm Fixed	280	0.36
TB1200-O	1200mm Offset	358	0.36
TB1300-F	1300mm Fixed	290	0.4
TB1300-O	1300mm Offset	370	0.4
TB1400	1400mm Fixed	300	0.42
TB1500	1500mm Fixed	310	0.46

Model TB1200-O is the most popular and suitable for Avant 635/640
Customers report equivalent transport of 7 to 8 heaped wheelbarrows per load
